Our orphans at FEED500 were grateful when a Medical Mission Team from Lakeland, Florida, U S A visited recently. Not only did they have their hot meal of maize and beans and unga to take home, they also received treatment and medication for their varying skin problems and other diseases. The team also ran a medical camp for our CHS students. One girl was suffering with headaches in the classroom and was found to need spectacles, which were generously supplied. The team were such a blessing!

Our carpentry students at Celebration Vocational Training Centre are very inventive. They made chapati holders with all the scrap bits of wood left over from their 2nd semester. Nothing is wasted! This 3rd semester sees final exams in December. After, the students go for attachment with a local company for 3 months. The same for our tailoring, plumbing and electrical engineering students. It's been a successful first year, equipping students with the skills needed to secure jobs, to afford a better future.

It was so lovely to have some of our Casuarina kidz visit for the summer holiday! Mariamu (in orange) and Kadenge (lilac t shirt) are our last two to fly the nest. Both have been offered Bachelor of Commerce degree courses at Nairobi University and Eldoret University respectively. 4 years of study now lies ahead of them! Both were a little nervous about this new chapter in their lives but excited at the same time. Great that their brothers and sisters were around to give them some tips. How proud we all are!
